Subject: Announcement "The Mathematics of Disorder"
University of Bonn (Germany)

The event "The Mathematics of Disorder"
will take place at the University of Bonn 4-8 October
2016.

This five-days event is designed for young female
graduate students
(Master and Ph.D.) and postdocs interested in the
interplay between
probability and analysis, and their applications.

This event will consist in the thematic school Young
Women Academy
(4-6.10.2016) with three minicourses

- Random matrices: Mylène Maïda (University of Lille)
- Random Schrödinger operators: Frédéric Klopp
(University of Paris 6)
- Stochastic PDEs: Massimiliano Gubinelli (University of
Bonn)

followed by the workshop Young Women in Probability and Analysis

(6-8.10.2016) with lectures by:

- Silke Rolles (TUM Munich)
- Sandrine Péché (University of Paris 7)

This workshop will provide a platform for young female researchers to present their work.

Female participants are invited to submit an abstract for a contributed talk or poster and apply for financial support.

All participants are encouraged to remain for the whole event.

Please do not hesitate to share this announcement with your students and colleagues.
