

PhD studentship in Probability at University of Bath (UK)

The position will be held in the probability group at the University of Bath, under the supervision of Alexandre Stauffer. The project is flexible, but the main areas of interest are interacting particle systems, random walks, and Markov chain mixing time.

Applications should be submitted through the online system (see <http://www.bath.ac.uk/math-sci/postgraduate/>). Interested candidates are encouraged to write to a.stauffer@bath.ac.uk to discuss their research interests.
