Subject: Several PostDoc positions in math at  
Chalmers/GU, Göteborg, Sweden

We have several vacant positions as PostDoc in math

at Chalmers/GU in Gothenburg

[http://www.chalmers.se/en/about-chalmers/  
vacancies/?rmpage=job&rmjob=3614](http://www.chalmers.se/en/about-chalmers/vacancies/?rmpage=job&rmjob=3614)

Closing date is February 1, 2016.

Postdoctoral positions in Mathematics

The Division of Mathematics at the Department of  
Mathematical Sciences at  
Chalmers and the University of Gothenburg invites  
applications for several  
two-year Postdoctoral positions starting August 1, 2016  
or as agreed.

Outstanding applications from all mathematical research  
areas will be  
considered. Precedence will however be given to those

who have a research profile compatible with existing research areas at the division. You are encouraged to make an initial contact with a potential mentor at the division before applying and to indicate this person in your application.

We conduct research at a high international level in areas such as algebraic geometry, number theory, algebra and representation theory, harmonic analysis and partial differential equations, computational mathematics and optimization, discrete mathematics and probability theory, complex analysis, functional analysis, kinetic theory, general relativity and biomathematics.

More information about our research areas is available on the website

<http://www.chalmers.se/en/departments/math/research/research-groups/>

To enhance your chances in future applications for

permanent positions we offer you the possibility that up to 20 % of your work may be spent on teaching. Our teaching languages are English and Swedish. As most of our teaching is in Swedish, teaching options will vary according to your language skills.

For further information and application procedure, please
