A few words about the university and the department:

With 275 laboratories shared with the CEA, CNRS, IHES, INRAE, INRIA, INSERM, Onéra, Université Paris-Saclay represents 13% of the French research potential. Located south of Paris, on a vast territory (from Paris to Orsay, via Evry and Versailles), Université Paris-Saclay benefits from a strategic geographical and socio-economic position enhanced by its international visibility. Université Paris-Saclay operates on a classified and protected natural site, close to Paris, and at the heart of a particularly dynamic ecosystem. With of 48,000 students, 9,000 professors and lecturers, and 11,000 technical and administrative staff, Université Paris-Saclay is a driving force for the development of its territory and one of the best institutions in France.

The Institut de Mathématiques d'Orsay (IMO) is the largest mathematical department of Université Paris-Saclay with more than 150 researchers (+ more than 100 PhD students). Most of areas of mathematics are represented within 5 groups (Harmonic analysis, PDEs, Arithmetic and algebraic geometry, Probability and Statistics, Topology). Hence, working at the IMO is a good opportunity to mix with excellent researchers and students from all disciplines. The IMO is located in Orsay, approximately 45min from Paris center by train. In July 2020, the University ranked 1st in Shanghai ranking's in mathematics.
