

Subject: Faculty Positions, Applied and Computational Mathematics

From: Tiangang Cui <tiangang.cui@monash.edu>

Date: May 17, 2018

The School of Mathematical Sciences at Monash University invites applications for a number of continuing academic positions in Applied Mathematics at all levels. The school is currently going through a phase of significant growth that will reinforce its position as a research leader in Applied Mathematics.

Research areas of interest include Mathematical Biology, Computational Mathematics, and related areas in Applied Mathematics.

We are interested in outstanding academics who apply their mathematics research to problems in science, engineering, technology, and the

biomedical sciences. These are continuing positions subject to probation review after five years. For more information, please see the details at the end of this email.

Monash University is a leading Australian research university that ranks in the top-100 globally. Monash University is located in Melbourne, which is a major cosmopolitan centre and has been named the world's most liveable city for five years in a row.

Application deadline is 8 July 2018.

Professor/Associate Professor in Applied Mathematics
(Mathematical Biology or Computational Mathematics)
