

## **\*\* 13 postdoctoral positions in Montreal \*\***

(scad. 13 novembre 2020, ore 23:59 US Eastern Time)

There are many postdoctoral positions available in Montreal for the coming academic year (at least 13) - further information below.

These are for candidates in all areas of mathematics. Candidates in probability theory and related fields will work with members of the probability lab. Candidates are encouraged to contact lab members who they are interested in working with, as applications are more likely to be successful when they have lab support.

Please note that the application deadlines are quite soon - November 13; candidates are encouraged to submit applications as soon as possible.

There are two postdoctoral fellowship competitions. Further details on the two programs can be found on MathJobs (<https://www.mathjobs.org/jobs/list/16367> and <https://www.mathjobs.org/jobs/list/16288> - English follows French in the second posting), and on the probability lab website linked above.

In addition to the vibrant mathematical life in the probability laboratory and in Montreal more generally, candidates may be interested in the thematic program on probability and PDEs ([link](#)), which will take place in Montreal in the first half of 2022 (postponed from 2021 due to COVID), and featuring several workshops, mini-courses, and numerous long-term visitors from around the world.
