

Subject: Professorship Position in Applied Analysis, RU
Nijmegen, Netherlands

From: "Sonner, S. (Stefanie)" <Stefanie.Sonner@ru.nl>

Date: Wed, 24 Jan 2018 07:55:12 +0000

Radboud University (Nijmegen, Netherlands) is looking
for an

experienced mathematician with an established research
and teaching

record in applied analysis (including partial differential
equations,

mathematical modelling, and related subjects). The

position is ideally

suited for candidates with an internationally visible
research

programme, external funding, and significant teaching
and supervisory

experience.

The position is in principle a full professorship
(hoogleraar), but

more junior applicants with high potential will be
considered for

initial appointment as an associate professor (UHD),

including a
career track towards full professorship.

The application deadline is 14 March 2018.
