

Postdoctoral position in Probability (Paris)

Deadline: 28/02/2018

Postdoctoral position in Probability (ANR grant SWiWS)

We offer a 2-year postdoctoral position in Probability Theory beginning

September 2018 and funded by the ANR grant SWiWS.

All candidates with a

background in Probability or Mathematical Physics, and interested in working

on the mathematical aspects of polymer folding, interacting random walks and

related topics, are encouraged to apply. The position is officially attached

with Paris-Est, and collaboration is expected with members of the SWiWS

project (see below).

Eligibility criteria:

Holding a PhD in Mathematics. The selection will be based on the excellence

of previous scientific achievements and the quality of the scientific

project.

Members of SWiWS project:

Amine Asselah, Quentin Berger, Francis Comets,
Yueyun Hu, Julien Poizat,
Bruno Schapira, Perla Sousi.

Contract details:

Funding will also be available to participate in scientific events related to the project.

Research stays in Marseille and Cambridge are possible.

Applications should be sent by email and include: a CV, a list of

publications, a description of research project as well as 2 letters of recommendation.

Contact :

Any member of the SWiWS project. See the following webpage:
