Subject: Autumn school "Lie theory, geometry, differential equations",

Giessen & Marburg, 10-13 October 2017]

Dear colleagues,

Please distribute this announcement among your undergraduate students, your graduate students and your postdoctoral researchers!

The Maths Institutes of the Universities of Giessen and of Marburg are organizing an Autumn School on "Lie theory, geometry, differential equations" on Castle Rauischholzhausen (JLU Giessen) from Tuesday 10 to Friday 13 October 2017.

The school consists of four lecture series, some contributed talks, and a poster session. The lecture series are:

Hansjörg Geiges (Cologne): Contact geometry and dynamics

Nicolas Perrin (Versailles): Varieties with a group action

Mihaela Pilca (Regensburg): Locally conformal Kähler geometry

Anke Pohl (Jena): Eigenfunctions on locally symmetric spaces

Please register via the conference website

<http://www.mathematik.uni-marburg.de/~agricola/rauisch2017/>

<http://www.mathematik.uni-marburg.de/~agricola/rauisch2017/registration.php>

Please indicate during registration whether you'd like to contribute a poster or a talk and whether you apply for funding. We managed to raise funding from Volkswagenstiftung which will enable us to fund the accommodation costs of roughly 70% of the

participants and to provide a limited number of travel grants.

For your travel plans please note that the nearest major train station is Marburg Central Station. We'll have a bus shuttle leave from Marburg Central Station to Castle Rauischholzhausen on Tuesday, 10 October 2017 at 11 a.m. The return bus shuttle will be scheduled in such a way that all trains leaving from Marburg Central Station on Friday, 13 October 2017 after 5.35 p.m. will be reached.

For details please consult the conference website:  
<http://www.mathematik.uni-marburg.de/~agricola/rauisch2017/travel.html>

We hope to see you at Rauischholzhausen in October 2017!

The organizers
