

Subject: Postdoc Position, Sydney

From: Thanh Tran <[thanh.tran@unsw.edu.au](mailto:thanh.tran@unsw.edu.au)>

Date: February 29, 2016

Applications are invited for a Postdoctoral Fellow to work on an ARC

Discovery Project awarded to Chief Investigators Assoc. Prof. Thanh

Tran (UNSW Australia) and Prof. Beniamin Goldys (University of

Sydney). The project is entitled "Novel approaches for problems with uncertainties".

Applicants should have a PhD degree or be very close to completing

one. Although an experience in the following areas of mathematics is

preferred, candidates with strong qualifications in a relevant field

of mathematics are encouraged to apply and will be carefully

considered: 1) Numerical partial differential equations 2) Stochastic

partial differential equations.

The successful applicant will play a leading role within a collaborative research team and, in collaboration with other team members, is expected to publish in leading international journals.

The position will be at UNSW, initially for a fixed-term of 1 year, but will likely be extended for a further period subject to availability of funding. The position is available for an immediate start.

Additional information and application details can be found at
