

A Super Quantum Lie Day

Web: <http://crm.sns.it/event/325/>

Centro di Ricerca Matematica Ennio de Giorgi, February 4, 2015

Workshop theme: The aim of the workshop is to present recent advances and future trends in non commutative Quantum and Super Geometry.

Organizing committee:

Prof. A. D'Andrea (University La Sapienza, Rome)

Prof. R. Fiorese (University of Bologna),

Prof. F. Gavarini (University Tor Vergata, Rome)

Invited Speakers

Prof. Ivan Angiono

Prof. Stephane Launois

Prof. Meng-Kiat Chuah

Prof. Vera Serganova

Prof. Ulrich Kraehmer

This workshop is partially supported and organized as part of the activities of the research program "PRIN 2012 - Spazi di Moduli e Teoria di Lie" (supported by MIUR, Italy). It is included among the activities of the special INdAM intensive on "Perspectives in Lie Theory", organised by the research program "FIRB 2012 - Prospettive in Teoria di Lie": the themes treated in that intensive period also fall within the range of research themes which are objects of the research program "PRIN 2012 - Spazi di Moduli e Teoria di Lie".
