YOUNG ALGEBRA SEMINAR 2003 – 2004

The Department of Mathematics of the University of Rome "Tor Vergata" organizes a "Young Algebra Seminar". This is thought of as a permanent forum in which young researchers in Algebra (in a broad sense) are asked to illustrate the main problems, results, and methods in their area of research. A main goal of the seminar is also to set up a meeting point in which specialists working in the different areas of Algebra exchange their views and discuss their problems, by sharing their experience and their ideas.
