

12 PhD position in the RTG "Coping with Uncertainty in Dynamic Economies" at Bielefeld University

Dear all,

The newly established research training group (RTG) "Coping with Uncertainty in Dynamic Economies" at Bielefeld University has been recently sponsored by the German Research Foundation (DFG) for up to 9 years. In a first step, we will fund **12 doctoral students for four years of study**. The positions are fully funded, at competitive levels (approx. 40.000 Euro gross per year). The RTG is an initiative of ten principal investigators from the Center for Mathematical Economics and the Data Science Research Group at Bielefeld University. Next to the well-established core program of our doctoral school **BiGSEM** (www.bigsem.de), students will thus work in an excellent research environment on topics involving uncertainty in its various aspects and their consequences for dynamic economies. Also, the research training group holds strong ties with top international researchers who will give specialized block courses and summer schools.

More information about the application procedure and deadlines can be found:
