

One Postdoc in Applied Analysis at the Department of Mathematics of the University of Genoa

One Postdoc in Applied Analysis at the Department of Mathematics of the University of Genoa, Italy. The main research themes will be inverse problems, PDE, applied harmonic analysis and machine learning. Candidates who are familiar with one or more of these topics are encouraged to apply.

The start of the positions is planned in July 2021 (or shortly thereafter), and the duration of the contract is 1+1 years. At this stage, perspective candidates are only asked to complete an [expression of interest](#) by April 10th. For more details visit https://ml.unige.it/job_posts/.

All the research activities will be carried out at the University of Genoa within [MaLGa](#), a newly established machine learning centre. The centre carries out research in different aspects of machine learning, from

theoretical to applied aspects. Today the centre counts 11 faculties and 35 PhD students/postdocs and provides a lively and dynamic work environment.

DEADLINE 10/4/2021.
