** 2 positions at Hildesheim (Germany) **

There is a new group in Probability at the University of Hildesheim (Germany)
looking for PhD students and/or Post-Docs with research interests
preferably in the field of branching processes, time series analysis or
spatial stochastics.

Up to two positions (100 %, TV-L 13) can be filled. The position is with teaching obligations.
Applicants should be able to teach math in German after their first year.
Applicants who finish their Master thesis during this winter term are also welcome.

Please contact me for further information.

The detailed job offer can be found here (deadline will be extended until October, 7th):
