EMS-IAMP Summer School in Mathematical Physics,
Ischia 11-15 June 2018

This is the first announcement of the EMS-IAMP
Summer School in
Mathematical Physics on `Universality in Probability
Theory and
Statistical Mechanics', which will be held in Ischia
(Naples, Italy)
on June 11-15, 2018.

The main courses (6 hours each) will be given by:

- L. Erdoes (IST Austria)
- R. Peled (Univ. Tel Aviv)
- F.-L. Toninelli (Univ. Lyon-1)
- Y. Velenik (Univ. Geneve)

The school is targeted to PhD students, postdocs and
young
researchers. The four courses will introduce at a
graduate level

different methodologies used to understand in complementary ways
several instances of universality, ranging from eigenvalue statistics
of random matrices, to the large scale dynamics of stochastic
surfaces, to their massless Gaussian free field behavior at
equilibrium.

The school will take place in Grand Hotel Re Ferdinando
http://www.hotelreferdinandoischia.it/meeting.aspx
in Ischia, the largest island of the gulf of Naples.

We will provide financial support for students and young researchers.

Details about the registration, the application for financial support
and the website will come soon in a follow-up message. If, in the
meantime, you need more informations, please contact us via email at
agnese.dorazio@mat.uniroma3.it.
