The School of Mathematics at the University of Leeds is advertising up to two posts for Lecturers in Actuarial/Financial Mathematics. Please follow the link for details:

https://jobs.leeds.ac.uk/Vacancy.aspx?ref=MAPMA1061

The expected interview dates are 6/7 November.

The newly advertised jobs are part of a major strategic plan of the School to strengthen its expertise in Applied Probability and Financial Maths (last May we appointed 2 lecturers who are due to start in the autumn semester). The School is keen on supporting research in the area: last year it funded and hosted the conference "Stochastic Analysis of Dynamical Systems, Stochastic Control and Games" (www.maths.leeds.ac.uk/sandsycog); in September it will host and partly fund the conference "Stochastic Control, Ambiguity and Games" followed by the research week "Stopping Games for Ambiguity-Averse
People representative of current research interests within the group are:

1. Georgios Aivaliotis
