

Subject: Postdoc Position, Theoretical Fluid Mechanics,
McMaster

From: Bartosz Protas <bprotas@mcmaster.ca>

Date: October 24, 2017

An opening for a post-doctoral fellow is anticipated in
Dr. Protas'

research group at McMaster University with a start date
of September

1, 2018. The focus of this position will be fundamental
investigations

of extreme behavior, such as potential singularity
formation, in fluid

flow models using a combination of mathematical analysis
and

large-scale computations. Expected background
involves (ideally, a

combination of) theoretical fluid mechanics, large-scale
scientific

computing (including numerical optimization) and PDE
analysis. The

position will also involve a limited amount of teaching.

Applications

should be submitted via www.mathjobs.org

(Fellowship ID: McMaster-PDF [#11005]; the advertisement contains further details concerning the opening and the application procedure).
