

The School of Maths & Stats (The University of Melbourne) has just announced a new position: Lecturer (level B, comparable to assist. prof. in the United States of North America) in probability & stochastic processes, please see

<http://jobs.unimelb.edu.au/caw/en/job/891641/lecturer-in-probability-and-stochastic-processes>

for more detail.

**DEADLINE** Novembre 15, 2017

We have got a pretty good (IMHO) and friendly probability group, including at the moment Aihua Xia, Nathan

Ross, Mark Holmes and myself (plus, there are a few other people in the school with strong interests in probability theory & its applications).

So now we are trying to attract the best candidates (as

usual) and would be grateful if you could circulate the information as appropriate (and perhaps some of you might be interested in that position as well).

Thanks!

Best,  
kostya borovkov
