

**** Ph.d. position (Spatio-temporal clustering and extreme-value theory) ****

Please find attached a Ph.D. scholarship in Laboratory J.A. Dieudonné, University Cote d'Azur, Nice.

This Ph.D. scholarship will start in September 2021 for 3 years and focus on the study of clustering methods taking into account the spatio-temporal dependency.

A particular attention will be payed to programming the proposed methods and apply them to environmental data-sets. In addition, the selected student will be able to make proposals and test variant of the considered methods.
