** PhD and Postdoc positions in Stochastic Analysis at Oslo **

This is to bring to your attention the opening of a number of positions involving stochastic analysis, both at PhD and Postdoc levels at the Department of Mathematics, University of Oslo.

See here:
https://www.mn.uio.no/math/om/jobb/

Deadline for application: February 29.
An application to each position of interest (also if multiple) is mandatory for being considered in the evaluation.

See also the presentation of STORM - Stochastics for Time-Space Risk Models and its group of researchers:

https://www.mn.uio.no/math/english/research/projects/storm/

Strong of its large group, the interests of STORM are broad within stochastic analysis and its applications and include random fields, SDEs, SPDEs, finite and infinite dimensions, models of dependencies in dynamic setting, stochastic control, mathematical finance, energy finance. We are interested in numerical methods and machine learning.
