

**** Master's scholarships for students from foreign institutions at Labex Bézout (Paris) ****

The 2021-2022 hiring campaign for international Bézout master's scholarships is open **until May 21**. This year, we will be able to accept more applications than usual (about 10, compared to 7 usually). Bézout Master program is directed towards excellent students in mathematics or computer science (or both) from foreign institutions willing to pursue their studies in Université Paris-Est at the master's level. The laureates will receive about 1300 € per month over 11 months (pending approval of the University Executive Board) and will be proposed a room on the campus. Furthermore, the best students will then be invited to join the PhD program of the Doctoral School MSTIC (Mathematics, Sciences and Information and Communication Technology). A joint supervision with the student's national doctoral framework, leading to both PhD grades, is possible.

The details of the program can be found here: <http://bezout.univ-paris-est.fr/masters-scholarships/> . From the same webpage, a link to the application form is available; the deadline will be May 21.

A description of the activities of the Bézout Labex can be found at <http://bezout.univ-paris-est.fr/wp-content/uploads/2020/11/bezout-leaflet.pdf>
