Subject: Postdoc Position, Mathematical Fellowships, SISSA

From: Gianluigi Rozza <gianluigi.rozza@sissa.it>

Date: December 20, 2018

SISSA started a new post-doctoral program in Mathematics: the SISSA Mathematical Fellowships. Every year there will be a yearly call for two 3-years fellowships.

The 2019 is now open and the deadline to present the applications is the 8-01-2019 at 1.00 PM Rome time.

Appointments will start in September/October 2019 (but different arrangements are possible)

The fellowships are not restricted to a specific research theme but are intended to attract promising candidates in all fields of mathematics by providing them with the opportunity to

independently
pursue their own research as well as to enlarge their
research profile
by interacting with top- leading scientists.

The appointments will last up to three years and will be
provided with
a competitive salary together with a small research grant
that can be
autonomously used by the successful candidate.
