Postdoc on Models and algorithms for large networks from Big Data

The call for a 20 month postdoc is open at the Scuola Normale Superiore di Pisa (Italy). The topic of the research is Models and algorithms for large networks from Big Data" under the following EU project: "SoBigData Research Infrastructure", Acronym "SoBigData" (call H-2020-INFRAIA-2014-2015).

The details of the call are at

https://en.sns.it/bando/research-contract-named-%E2%80%9Cmodels-and-algorit hms-large-networks-big-data%E2%80%9D

The research fellow shall carry out the following activities: study and
implementation of models and algorithms for the study of the dynamics of complex networks of social, economic, financial origin; networks from time series; social pattern discovery; empirical analysis of Big Data.

The deadline is November 8. I would be grateful if you

could forward this
message to any potentially interested candidate.

The interested candidates can either contact me or the
addresses in the call in case they need further
information.

Thanks and all the best,

Fabrizio Lillo
