Subject: SYMMYS

Interested candidates can send an email
at elisa.appolloni@symmys.com.

The company

SYMMYS, LLC (www.symmys.com) is a privately held research institution based
in New York City, directed by Attilio Meucci.

SYMMYS? mission is to spread Advanced Risk and Portfolio Management (ARPM)
ideas and techniques in the financial industry and in academia.

The opportunity

SYMMYS is looking for new consultants for its research project in Advanced
Risk and Portfolio Management (ARPM).

The job, which requires a full time commitment, consists of reviewing and
coding case studies in advanced quantitative finance.

The consultant will work remotely from home or from one of the affiliate
universities, communicating via multi-media with other members of the SYMMYS
team.

The position represents an excellent academic experience for applicants who
intend to pursue a PhD, which SYMMYS may sponsor.

The position also presents a great opportunity for candidates (that maybe
have already a PhD) who wish to remain in the financial industry.

Indeed, the learning curve is constantly steep, and the compensation is
competitive.

The candidate

- Master's level degree in Physics, Mathematics, Economics or Computer Sciences

- Good knowledge of calculus, linear algebra, statistics, probability, financial mathematics

- Proficiency in LaTeX

- Proficiency in MATLAB

- Proficiency in programming languages, such as C/C++, JavaScript, Python, or similar (knowledge of Python, IPython and/or IPython Notebook are beneficial)

[cleardot.gif] - Working knowledge of English

Compensation

22,000 euros per year, paid monthly
