

**** Advanced School on complexity and emergence ****

Extended deadline

This is the final announcement of the upcoming

Advanced School on complexity and emergence: ideas,
methods, with a special
attention to economics and finance (CEIM)

The School will be held in the magnificent Villa del
Grumello, Como (Italy)
along the Lake Como shore on July 22-27, 2018.

The main courses will be given by L. Boi (EHESS ?
Paris), I. Capelli
(Università dell'Insubria), I. Ekeland (Ceremade -
Université Paris-Dauphine),
F. Guerra (Sapienza Università di Roma), J. Jost (Max
Planck Institute for

Mathematics in the Sciences - Leipzig), Florent McIsaac,
(Agence Française
pour le Développement), F. Patras (Université de Nice
Sophia-Antipolis), F.
Riedel (Center for Mathematical Economics, Bielefeld
University), F.
Semboloni (Università degli studi di Firenze), R. Seri
(Università
dell'Insubria).

The potential participants of the School are primarily
master and doctorate
students of mathematics, information sciences,
theoretical physics, and
economics, as well as research workers in those areas,
who want to enlarge
their spectrum of knowledge towards the area of
complexity. The aim of the
School is to provide these researchers useful
instruments from the theory of
complex systems, both on the theoretical level and the
methodological ones,
bridging the present disciplinary gap, and profiting from

knowledge and
insights from both communities.

The School may have some (limited number of) financial supports. Details about the registration, the program and the application for financial support are available at the website <http://ceim.lakecomoschool.org/>.

Deadline for application: 14th May.
